Art Unit: 1743

- 1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 21, 2006 has been entered.
- 2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
- 3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 4. Claims 15-19, 22 and 24-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 is indefinite since the preamble of the claim states that the oral heparin tablet produced in the process has a melting point of from 25°C and higher. However, none of the steps of the method positively recite this limitation or how such a limitation comes about. It is not clear whether the second temperature at which the lipid phase solidifies is at least 25°C or higher.

Art Unit: 1743

On line 2 of claim 19, the phrase "the cooled bulk product" lacks antecedent basis.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 15-19, 22, 24-27, 29-34 and 36-41 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 36, 38, 41-55, 58, 60-63, 66-67 and 70-71 of copending Application No. 10/504,490. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims recite a solid oral tablet composition and a method for producing that comprises a continuous lipid component having one or more polar glycolipids and one or more non-polar glycerides, at least one of water or a mono-to trivalent alcohol in an amount of up to 15% by weight of the composition, and a pharmacologically active agent. The claims of application serial no. 10/504,490 fail to recite that the pharmacologically active agent is heparin. However, it would have been obvious to one of ordinary skill in the art at the time of the instant invention to include heparin in the composition recited in the claims of application serial no. 10/504,490 as

Application/Control Number: 10/516,858

Art Unit: 1743

the pharmacologically active agent since the claims of application serial no. 10/504,490 recite

that the pharmacologically active agent can be an anticoagulant, and heparin is a well-known

anticoagulant substance.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting

Page 4

claims have not in fact been patented.

7. Applicant's arguments filed September 21, 2006 have been fully considered, and they are

persuasive to overcome the previous rejections of the claims under 35 USC 102(b) and 35 USC

103 made in the last Office action mailed on May 25, 2006. Therefore, these rejections based

upon the references to Herslof et al (US patent no. 5,665,379), Nyqvist et al and Rosenberg et al

have been withdrawn. The claims are presently rejected under 35 USC 112, second paragraph

and on the ground of nonstatutory obviousness-type double patenting, as set forth above.

Application/Control Number: 10/516,858

Art Unit: 1743

8. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Maureen M. Wallenhorst whose telephone number is 571-272-

1266. The examiner can normally be reached on Monday-Thursday from 6:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Jill Warden, can be reached on 571-272-1267. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
